

DTU4G/IP NBN Ready Alarm Communicator

Why choose DirectWireless?

The **DTU4G/IP** is Australia's most trusted feature rich, wireless alarm communicator available.

Communicating via the Telstra 4GX and Optus 4G Mobile Networks, it provides multiple communication paths to your Central Monitoring Station.

The DTU4G/IP is your connection to the DirectWireless Network.

Australia's **only** dedicated, private alarm transmission network providing a world of hassle free alarm monitoring.

DirectWireless delivers high grade wireless alarm monitoring to over 95% of the Australian population and is ideal for high risk sites, as well as a ready option for most new or existing alarm systems that rely on traditional PSTN phone lines for communications.

Feature's Include:

- Dual SIM 4G technology
- Telstra 4GX & Optus 4G+ (3G failover)
- Plug & Play IP/Ethernet communications
